

UK EQUITY FUND FOR CHARITIES

INVESTMENT OBJECTIVE

The UK Equity Fund seeks to provide a level of income and investment growth greater than that of the FTSE All Share by investing ethically in the shares of UK companies.

ETHICAL INVESTING

Christian ethics are a first principle matter for Epworth. We aim to ensure that our investment decisions are consistent with the Christian faith. As such, all investments chosen by the fund must adhere to Epworth's established ethical pillars. To qualify for inclusion, each asset undergoes a meticulous due diligence process conducted by Epworth's experienced investment team and subsequently presented to the Asset Allocation Committee for evaluation. Continuous, rigorous monitoring of investments is conducted by the Epworth team. This involves regular interactions with the management of respective companies and third-party funds. The Responsible Investment Committee at Epworth is actively consulted in instances where specific stewardship concerns arise. For illustrative instances of fund investments and their qualification criteria, please refer to the accompanying case study map.

FUND SUMMARY

Fund Type	Charity Authorised Investment Fund (CAIF)
Inception Date	30 April 2019
Fund Size (31 March 2024)	£61.7m

COMMENTARY

The upbeat mood lifting UK stocks into the close of 2023 continued into the first quarter of 2024, although the market lagged global peers through much of the quarter as sticky inflation scaled back expectations for the timing and magnitude of interest rate cuts this year.

The fund underperformed during the quarter, partly due to the exclusion of military and fossil fuel companies that are benefitting from the escalating conflicts in Europe and the Middle East. The bias of the conviction portfolio towards smaller companies also dragged on performance, with larger stocks continuing to outperform in the higher interest rate environment.

The most affected holdings included Keywords Studios, a provider of video content creation services that faced weakness on concerns that developments in AI could threaten a part of their revenue stream. There were also contrasting fortunes for two of our IT exposed stocks. Whilst specialist IT recruiter, FDM, was one of the weaker performers after management reduced guidance for current year earnings, Softcat, an IT infrastructure reseller, was our best performing conviction stock following a strong set of results.

Whilst there were no additions to the UK conviction stock portfolio during the quarter, several positions were exited to reduce the number of holdings and focus on those stocks where we had a greater degree of confidence in both quality and valuation. The exits included Watkin Jones, which has performed poorly due to headwinds in the UK construction market in recent times, and there have been additional execution-related issues resulting in senior management changes. Another exit was Hilton Food Group, a food packaging business held for many years. The company has grown significantly during that time, but it was felt this was reaching a point where there was limited scope for improving profitability in the modern consumer environment.
